

# Asia Pacific International School

## Nowon-gu, Seoul, South Korea

EP's holistic approach to supporting student learning and teacher efficacy made the platform the perfect solution.

APIS is a leading International School based in South Korea, with an enrollment of 350 students between k-12. Following the US Curricula, the school prides itself on rigorous and innovative programs designed to provide personalised and relevant learning pathways for each student.

## About

APIS has been using EP since 2018 and carries a reputation for high quality teaching and a dynamic and innovative curriculum.

Member of the following associations:

- East Asia Regional Council of Schools
- Western Association of Schools & Colleges
- National Association of Independent Schools

## Our online learning journey

APIS first experienced the impact of EP in 2018 after using the program during a Language learning competition. The student engagement was evident and provided each learner the targeted level of material at the right time.

## Why Education Perfect (EP)

As a school that prides itself in academic performance, EP aligned perfectly to the strategic goals.

1. **EP plugs directly into Google Classroom - this is incredibly powerful.** For example, I can post directly into Google Classroom and view my students' learning progress in real time through the live feed. Data analytic tools allow the teacher to track students' completion and mastery of Chinese. These tools are convenient and

easy to use for both the teacher and students.

2. **EP aligns to the curriculum standards of the school and can be further customised if required.** The topics of each level align with the Chinese unit themes at our school. The activities are comprehensive, allowing students to practice vocabulary, listening, speaking, reading, writing, and grammar. We use EP for supplementary exercises or tests. Students can work on teacher-assigned tasks that allow them to practice the same skill multiple times, learning from their mistakes. This allows the students to make continuous progress toward their learning goals, and gives the teacher the tools to track student growth.
3. **Teachers have the discretion to freely edit various exercises.** I was able to edit listening, speaking, reading and writing exercises based on the actual content I taught.
4. **The content (getting started, beginner, intermediate, advanced) is very systematic, which is convenient for differentiation and online study.** Our school started online classes in March 2020, with some online classes still continuing today, and EP has been very helpful for Chinese teaching during this unique period. Tests on EP have played a very important role. There are also excellent learning opportunities for teachers through webinars and EP certification levels. I found these brilliant, and they encourage me to learn as an educator.

---

**“My students love Education Perfect. Because my students are very different from one class to the other, I often assign them different tasks according to their level. It’s very good for personalised learning”.**

**Grace Gao**  
Department Chair, Chinese  
Asia Pacific International School

---

## Impact

- Increased student engagement due to personalised and skill appropriate content.
  - Teachers are exposed to greater learning opportunities through the EP webinars and certification programmes.
-

- 
- The assessment feature has allowed teachers to examine students progress during remote learning periods.
