## About

Colegio del Valle is a bilingual institution based in the Northwest of Mexico, founded in 1992 in Culiacan, Sinaloa. We are recognized as leaders in bilingual education, having worked alongside prestigious publishing and certification houses. Our education philosophy is rooted in the principles of constructivism, interdisciplinarity and humanism.

## Our online learning journey

Colegio del Valle has always sought for innovative alternatives to resolve relevant issues in Education.

In 2020, we trailed Education Perfect and subscribed to the full-suite as a result of our piloting.

## Why Education Perfect (EP)

We found EP while we were doing our research, looking up for ways to face the challenges brought by the quarantine. After a few tests, it became obvious that EP had exactly what we were looking for: an innovative alternative for online instruction, which could also be implemented in face to face instruction.

Right after the piloting period ended, we gathered input from our students and teachers. There was general acclaim, EP showed great potential and our school community wanted to continue working with it in the school year of 2021.

Our latest stats show that students have answered more than 1,500,000 questions and spent around 12,000 hours on the platform (and we only have 181 students using EP). This is a clear indicator of the success of this implementation.

---

“Education Perfect represents a great opportunity to offer our students something new, while being sure we're providing them with relevant content and significant learning opportunities.”

**Miguel Yañez**  
Head of the English Department  
Colegio del Valle

---

## Impact

- Teacher duties were simplified. Our teachers can now focus a lot more on the practical aspects of teaching instead of spending hours doing administrative tasks and manual revisions.
- The curriculum is structured and well-scaffolded; it presents relevant topics and a variety of content and exercises.
- Smart lessons are attractive for students and they promote autonomous learning.
- The f2f class experience also benefited from the different functionalities EP has to offer, real-time monitoring allows the teacher to provide punctual and useful feedback.
